Version 15.3 Release Notes
9/3/2013

About/Contact Info

Version 15.3 is the latest update to the MicroBiz Business/Liquor/Bike Controller Series. For Release Notes on a previous release of MicroBiz, please check our updates page online (http://download.microbiz.com).

You can reach us through our website at **www.microbiz.com** or by phone:
- **Technical Support:** 800-929-8324 Option 1
- **Sales:** 800-929-8324 Option 2

Before Installation

- ⏱ Please familiarize yourself with the contents of these Release Notes for details regarding this version of MicroBiz.
- ⏱ You must be on MicroBiz Business/Liquor/Bike Controller series for Windows version 9.0 or above to apply this update.
- ⏱ As with any upgrade or change to your MicroBiz system, a complete backup of your Local and System Files Paths (BizWin and Business directories by default) should be made prior to the upgrade.

Major Highlights

The closeout process will now let you retry a closeout if there was a printing or computer issue during the closeout process. While the closeout is running, invoices are synchronized with the database so you are sure to get accurate closeout information.

Once upgraded to 15.3, all your future installs will be managed by a new installer package. The new installer automatically detects if the install needs to be made on the server or client. The new installer also allows for the installation in subdirectories and speeds the overall install process.

Tender type options are more flexible, simpler to use and more powerful. For each tender type, there is an option to enable/disable, require customer, open drawer and require a signature. There are also two additional tender types, providing even more flexibility in the tender process.

Fixes

This section lists all Issues that have been fixed as of this release.

- Promotions - Customer / product load order is no longer significant.
- Promotions now function even without consolidating skus
- The store's State and Zipcode now appear on purchase orders
- Improved transaction setting organization
- Resolved closeout process' sporadic issue involving "Apply to Account"
- Correct keyblock driver included with installer
- 'Copy' button in 'Store Name / Ship to Data' now also copies 'State' and 'Zip' fields
- Credit Card info now prints consistently after switching invoice types
- Deposit refunds no longer add tax
- Data paths including spaces no longer cause problems in Query Manager
- Fixed incorrect pole display for fractional and non-single quantities
- Fixed purchase order freight distribution

Features

This section lists all other Improvements to this version of MicroBiz.

- Allow any vertical on any licensed keyblock
- Registry now holds paths, install versions, and install dates
- Tender options are now far more flexible without sacrificing simplicity
- Additional Custom Tenders
- Electronic signature capture using Magtek's "IPAD SC" on any tender type
- Variable Coin Deprecation
- Simple Closeout failure recovery.
- Automatic invoice recovery (synchronization)
- Option for new look without losing title bar and taskbar.
- New installer allows faster install and installation in subdirectories
- Return to Credit Card is more intuitive than in 15.2
- Improved transaction setting organization
