About/Contact Info

Version 15.4 is the latest update to the MicroBiz Business/Liquor/Bike Controller Series. For Release Notes on a previous release of MicroBiz, please check our updates page online (<http://download.microbiz.com>).

You can reach us through our website at **www.microbiz.com** or by phone:

- **Technical Support:** 800-929-8324 Option 1
- **Sales:** 800-929-8324 Option 2

Before Installation

- Please familiarize yourself with the contents of these Release Notes for details regarding this version of MicroBiz.
- You must be on MicroBiz Business/Liquor/Bike Controller series for Windows version 9.0 or above to apply this update.
- As with any upgrade or change to your MicroBiz system, a complete backup of your Local and System Files Paths (BizWin and Business directories by default) should be made prior to the upgrade.

Highlights

MicroBiz v15.4 was released to fix some issues reported within the v15.3 version. The fixes include sporadic problems with closeouts not printing all reports or even finalizing due to an error occurring during the closeout process. We also looked into, and fixed the problem with the Packing List printer not printing to the selected printer, but to the Default Windows Printer. You may also notice that with this version you will no longer experience a random issue where miscellaneous transaction settings were being reverted back after exiting MicroBiz. While no major Enhancements have been added to this version, we felt it necessary to fix these problems right away and release a fixed version.

Fixes

This section lists all Issues that have been fixed as of this release.

- Sporadic Closeout Errors causing closeouts to fail or not print
- Packing List now prints on specified printer instead of Default Windows Printer
- Change Due in Large Quantities is now allowed
- Maximum Tender Limit now found in Transaction Settings

Features

This section lists all other Improvements to the version 15.x of MicroBiz.

- Allow any vertical on any licensed keyblock
- Registry now holds paths, install versions, and install dates
- Tender options are now far more flexible without sacrificing simplicity
- Additional Custom Tenders
- Electronic signature capture using Magtek's "IPAD SC" on any tender type
- Variable Coin Deprecation
- Simple Closeout failure recovery.
- Automatic invoice recovery (synchronization)
- Option for new look without losing title bar and taskbar.
- New installer allows faster install and installation in subdirectories
- Return to Credit Card is more intuitive than in 15.2
- Improved transaction setting organization
- Improved coding to make MicroBiz more stable (Continuously being fixed)
