## Version 16.1.1 Release Notes 06/04/2018

### About/Contact Info

Version 16.1.1 is the latest update to the MicroBiz for Windows. For release notes on a previous release of MicroBiz for Windows, please check our updates page online (<https://microbiz.com/windows-support-release-notes/>).

You can reach us through our website at [www.microbiz.com](http://www.microbiz.com) or by phone:

- **Technical Support:** 702-749-5353 Option 1
- **Sales:** 800-929-8324 Option 2

### Before Installation

- Please familiarize yourself with the contents of these release notes for details regarding this version of MicroBiz, including any limitations.
- You must be on MicroBiz for Windows version 9.0 or above to apply this update. Please call our support group to arrange a manual update if you are on a version older than version 9.0.
- As with any change to your MicroBiz system, it is very important to complete a backup of your local and system files paths (BizWin and Business directories by default) prior to beginning an upgrade.

### Highlights

Please view the list below for more information on fixes and improvements added to v16.1.1

## Bug Fixes

The following issues have been addressed in this release:

- Kit Components Indicate 0.00 Revenue on Sales by Department Report. This should now be fixed in this release.
- Focus on Add/Edit Inventory Window is shifting to the left one column after performing a search. This version will no longer experience this problem.
- Full page invoices and quotes over \$1000 only prints \$1 in Subtotal. The figures will now populate correctly on the full page invoices and quotes generated.
- Export Product Master causes MicroBiz to lose the Upper path ( Business link ). This issue is no longer an issue in this release.
- Export Product Master, exports with an incorrect QTY value, usually 0. Now the system will export this with the current values in the QTY field.
- Reprint Old Invoice prints with the current time. With this release, all reprints using Reprint Old Invoice will print with the time recorded on the original sale.
- F6-Edit button is showing with a form of QTY SOLD rather than Line Number to Edit. The system has been updated to show the proper line edit form.
- Message of Unknown Member "TXTAUTOCOMPANY" is displayed with loading a customer to the front register when a specific transaction option is enabled. This message will no longer display.
- Gift Cards have been updated to call to the proper online URL, fixing the location not found or invalid account error when trying to process a Gift Card in v16.1.0

## Improvements and Enhancements

Improvements to version 16.1.1 of MicroBiz are as follows:

- Signature Capture with OpenEdge. When v16.1.0 was introduced we did not include the function of Signature Capture. This has been updated in this release and will allow users with the Ingenico iSC250 to use this device to capture signatures for all tenders except for Debit when require signature is enabled in the tenders tab. Alternatively, users with an Ingenico iPP320 can use one of four Topaz devices to capture a signature instead of using an iSC250 device.
